

Topic Task Week 6 – Computing

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <link rel='stylesheet'
5   </head>
6 </html>
7 <body>
8   <p>Paragraph One.</p>
```

< HTML />

Unit 2 HTML formatting and CSS

This week, you will be using your HTML coding knowledge from Spring term and learning how to add more features to a web page such as changing the fonts, colours background and debugging.

Task: To complete Lessons 1, 2 and 3 of Unit 2 HTML coding. Follow the instructions below to find the correct unit.

Your login details are:

Southwold
Username: student3397
Password: southwold

Step1: Use the link below to get to the correct webpage or type in 'Espresso Discovery' into google and it should be the top link.

<https://www.discoveryeducation.co.uk/what-we-offer/discovery-education-coding>

Step2: In the top right of the screen there is a login tab. Click it and select coding. Then use the login details above to sign in.

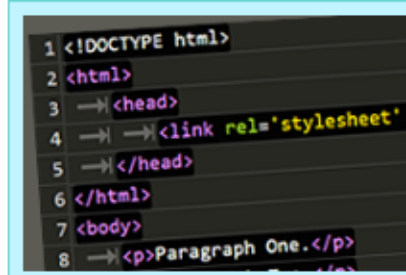

Step3: You will see options like in the picture below. You need to click the middle option.

Step4: You will see options like in the picture below. You need to click the HTML option.

Step5: Select Unit 2

Unit 2

HTML formatting and CSS

Learn how to format an HTML page using styles and CSS (Cascading Style Sheets). Use code to change the background colour of the page and the font size and colour.

Step6: Click each lesson from the bar on the left and then press start.

Lesson 1. Changing colour

Lesson 2. Fonts and Sizes

Lesson 3. Background colours and patterns

You will find that there is a video at each stage to show you what you need to do, if you get stuck. Follow the video exactly to succeed in each task.

Remember, your coding needs to be perfect. That means, it must have the correct capital letters in the correct places and only a space where is necessary.
