

Year 2 Half Term Homework

Your topic in Spring 2 will be:

Antarctica

Geography: Cold environments

Science: Use of everyday materials

Please research the topic using the internet or by going to your local library. You could create a presentation to share with your class or maybe make a model!

We look forward to receiving pictures of these via the Home Learning website.

For additional activities to complete over the holiday, head to the Wider Curriculum section of the Home Learning page on the school website.
