

## **Year 3 Week 1 Science: Forces and Magnets**

### **L1: To explore how a magnet behaves**

#### **Success Criteria:**

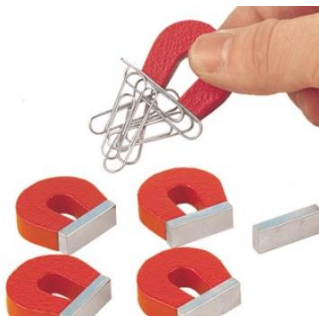

I can use key vocabulary to describe what I observe.

I can ask questions about what I can see.

I can explain what I already know about magnets.

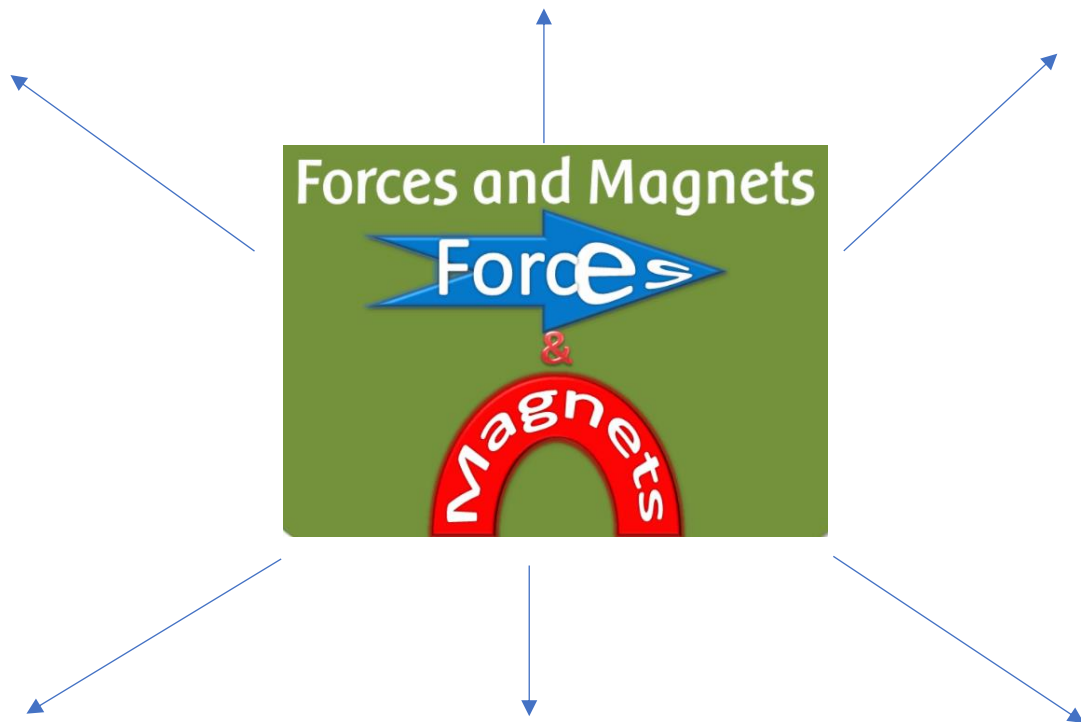

Task 1: Look at the items below and write 3 sentences about what you already know from previous learning, about forces and magnets:

### **Science resources**

Task 2: Watch the video below and create a mind map about what you currently understand about magnets and forces when it comes to magnets attracting and repelling. What new vocabulary have you learned?

<https://www.youtube.com/watch?v=grHz-X152sU>

Task 3: Answer the following questions:

What objects do you predict will be attracted to magnets in your house?

What materials, in your house, do you predict that will not be attracted to magnets?
